

Salamander's Report - Roan Mountain Naturalists' Rally - Spring 2006

Just thought I would make a post of the salamanders that were found on the walk led by Greg McConnell during the Roan Mountain Spring Naturalists Rally. I guess the two notable misses were the Weller's and the Yonahlossee.

Mountain Dusky
Northern Dusky
Blackbelly
Seal
Ravine
Northern Slimy
Redback
Jordan's

A couple of Northern Ringneck snakes were also found. The walk was held behind the visitors center on the trail to the mine. Luckily we had four kids with us which aided immensely in the discoveries :)
